NEBOSH Celebrates 40 years

NEBOSH – one of the world's leading names in health and safety – is celebrating its 40th Anniversary. It all started in 1979 and from there NEBOSH has been at the forefront of improvements to global health and safety that have helped to save lives.

NEBOSH Chief Executive, Ian Taylor, said: "To go home safely at the end of the working day is a right, not a privilege. Over the past 40 years, NEBOSH has helped to secure that right for people all over the world. We will continue to ensure this global progress continues for many more years to come.

"We've got a great team of people, learners and partners behind us, and with an exciting new three year strategy – spearheaded by the launch of our new-look General Certificates earlier this month – the future looks incredibly bright."

# Explosions At Chemical Factory In Maharashtra

- **Date**

August 31, 2019, around 9:45 am

- **Location of Accident**

Rumit Chemsynth Pvt Ltd, Maharashtra, Dhule district, Waghadi village in Shirpur taluka

- **Details**

A leaking chemical from a barrel triggered fire which led to serial explosions in the factory at about 9:45 am, At least 100 workers were present in the factory out of which 13 Killed and 72 others seriously injured

- **Importance of maintaining health and safety standards and the improvements to be done.**

Fires can spread more or less rapidly depending on their causes, the nature of the material and goods alight, the fire prevention installations (automatic sprinklers), meteorological conditions, the ways the population is informed and the initiative it shows, as well as the speed and efficiency of the intervening services and of their fire-fighting equipment.

In the light of experience, prevention is seen to be most important and consists of two distinct components. On the one hand, the primary responsibility falling upon the political authorities empowered to implement the legal prescriptions concerning fire protection, to forecast accidents and to inform the population, as well as to set up measures and means for fighting fires and Explosions. On the other hand, the responsible behaviour of each individual based upon an education geared towards caution and the respect of instructions in case of fire.

- Store flammable and combustible liquids according to the laws, including building, fire, and electrical codes, that apply to your particular workplace. These laws specify the kinds of storage areas, such as storage rooms and cabinets, allowed for these liquids. They also specify how to construct these storage areas and the amounts of flammable and combustible liquids in different types of containers that you can store in each kind of storage area.
- Your local fire code will specify the quantity of liquid that may be stored at the workplace.
- Never use plastic or glass containers for storing flammable liquids unless storage in metal containers would affect the required liquid purity or if the liquid would cause excessive corrosion of the metal container.
- In all cases, allow only trained, authorized people into storage areas. Before storing, inspect all incoming containers to ensure that they are not damaged and are properly labelled. Do not accept delivery of defective containers.
- In general, store containers of flammable and combustible liquids separately, away from process and production areas, and away from other materials. This separation will reduce the spread of any fire to other materials in storage. It will also protect the stored flammable and combustible liquids from exposure to fires in other areas, and accidental contact with incompatible materials.
- Keep containers closed when not in use.
- Keep the amount of materials in storage as small as possible. It is a good practice to keep no more than one day's supply of flammable and combustible liquids in the immediate work area. Return any leftover material to the proper storeroom or storage cabinet at the end of the day.

## Our Upcoming Batch Calendar for the month of Nov – Dec 2019

### NEBOSH IGC INDIA Batches Dates

Location	IGC Start Date & End Date
Delhi	12 <sup>th</sup> Nov 2019 to 22 <sup>nd</sup> Nov 2019
